---	--------------------	---

## List of Tables

# 1 Interpretation

```
48 process count {
49   input:
50   path(files) from files_ch.collect()
51
52   output:
53   file("results.csv") into counted_ch
54
55   container = ""
56
57   shell:
58   '''
59   echo "seed,ncores,nsrc" > results.csv
60   files=$(ls table*.csv)
61   for f in ${files[@]}; do
62     seed_cores=$(echo ${f} | tr '_' ' ' | awk '{print $2 " " $3}')
63     seed=${seed_cores[0]}
64     cores=${seed_cores[1]}
65     nsrc=$(echo "$(cat ${f} | wc -l) - 1" | bc -l)
66     echo "${seed},${cores},${nsrc}" >> results.csv
67   done
68   '''
69 }
```

Listing 1: The process *process* count in *nextflow/main.nf*.

## 2 Development

```
72 counted_ch.into{counted_for_ch; counted_xargs_ch}
```

*Listing 2: The channel `counted_ch` is duplicated, with one for each of `process plot_for`, and `process plot_xargs`, in `nextflow/main.nf`.*

### 2.1 Bash For Loop

```
75 process plot_for {
76   input:
77   path(table) from counted_for_ch
78
79   output:
80   file("*.png") into final_for_ch
81
82   cpus 4
83
84   shell:
85   '''
86   ncores_set=$(awk -F, '{if (NR != 1) {print $2}}' !{table} | sort | uniq)
87
88   for ncores in $ncores_set ; do
89     python !{projectDir}/plot_completeness.py \
90       --infile !{table} --outfile plot_for_${ncores}.png --cores $ncores
91   done
92   '''
93 }
```

*Listing 3: The process `process plot_for` in `nextflow/main.nf`.*

### 2.2 xargs Command

```
96 process plot_xargs {
97   input:
98   path(table) from counted_xargs_ch
99
100   output:
101   file("*.png") into final_xargs_ch
102
103   cpus 4
104
105   shell:
106   '''
107   ncores_set=$(awk -F, '{if (NR != 1) {print $2}}' !{table} | sort | uniq)
108
109   printf '%s ' $ncores_set | xargs -n1 -P4 -I ncores -d ' ' \
110     python !{projectDir}/plot_completeness.py \
111     --infile !{table} --outfile plot_xargs_ncores.png --cores ncores
112   '''
113 }
```

*Listing 4: The process `process plot_for` in `nextflow/main.nf`.*

### 3 Execution

#### 3.1 SNR Plot

Figure 1: The Signal-to-Noise Ratio (SNR) is presented for a range of seed SNR values. This figure was produced by `process plot_for`, for the case of `cores = 1`.

### 4 Analysis
